Profile

Proficient in crafting dynamic and responsive web solutions as well as mobile applications, my expertise lies in delivering user-centric experiences. With an extensive toolkit encompassing React, Next.js, TanStack Query, Git, Node.js, Webpack, SCSS, and UI libraries like Material-UI and Ant Design, I've honed my skills in creating seamless digital experiences.

Throughout my career, I've been deeply involved in diverse projects, spanning the entire development lifecycle. This includes not only architecting applications from the ground up but also guiding junior developers to foster growth. Collaborating seamlessly with cross-functional teams, I've consistently contributed to the production of top-notch products.

Employment History

Front end Developer, 42 works, Rostov-on-Don

FEBRUARY 2020 – PRESENT

In my role, I'm engaged in front-end application development, which includes tasks such as defining application requirements, designing client-server architectures, configuring data storage solutions, and structuring component systems. Additionally, I specialize in developing microservices using Node.js and bringing ongoing projects to completion. An integral aspect of my work involves creating responsive layouts using HTML5 and CSS3, ensuring cross-browser compatibility and delivering exceptional visual and user experiences.

Examples of work:

- [Narai Market](#) | [Narai Platform](#) - Landing and B2B Platform. Unveil the future of B2B commerce on our dynamic Marketplace Platform. Crafted with precision using React, Mantine UI, Next.js, TanStack Query, and axios, this platform redefines industry standards.
- [Exness](#) - Embark on a financial journey with the Exness Informational Site. Powered by React, AWS, Node.js, Material UI, and GraphQL, it seamlessly merges information and technology, enhancing your insights.
- [YourCare](#) - Simplify healthcare through our Medical Portal. Seamlessly navigate tools, surveys, and services via React, Next.js, React-Query, and Formik. Experience a refined approach to medical interaction.
- [42 Works](#) - Immerse in our company's narrative with Nuxt.js. Dynamic Server-Side Rendering (SSR) forms the backbone of our corporate site, providing a compelling digital experience.

Education

Bachelor, DSTU, Rostov-on-Don

SEPTEMBER 2015 – JUNE 2019

Specialization - applied informatics in economics
